

Sprint 1

Project Group Number in Canvas: 11

Group name: Techie Tribe

Group Members: Gabriel Geneblazo, Chris Hanson, Taylor Newman, Lauren Ostrea, Eunique Williams, Duane Shelton

Link to GitHub Repo: <https://github.com/ggenebla/Event-App.git>

Link to Trello Board: <https://trello.com/b/STRSS7iS/backlog>

1) What is the lowest grade your group will be satisfied with? *A/B*

2) Our agreed time-management strategy will be to: *Work well ahead of deadlines*

3) Describe how you will handle your team leadership:

Collaborative leadership, assign roles to each member, and help others if needed.

4) How do you plan to handle the situation if someone does not meet expectations? Has everyone agreed to this strategy?

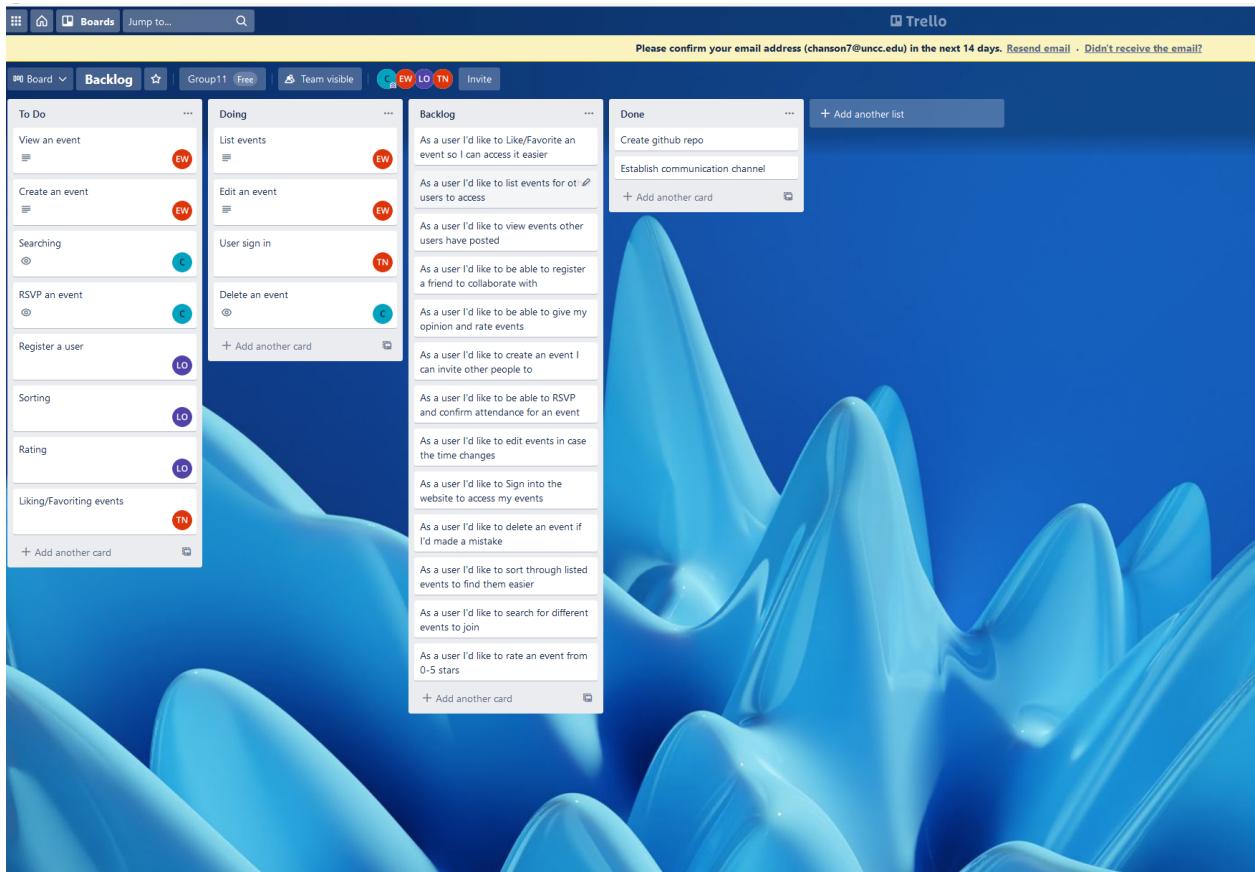

We'll talk to each other first, attempt to amend whatever the problem is.

If that doesn't work then we'll talk with the TA's or professor.

5) Brainstorm possible features for your software product and list a minimum of 10 features:

- 1) Calendar
- 2) Invite people to the scheduled meeting
- 3) Ability to move the scheduled meeting
- 4) RSVP/confirm attendance
- 5) Map to decide where the meeting will take place
- 6) Reminder/alarms for upcoming meetings
- 7) Info panel on what meeting is about
- 8) Folders for different types of meetings work/school/etc.
- 9) A way to upload notes to the cloud and access at a later date
- 10) If it's a virtual meeting, chat will be included

Trello board screenshot:

Tia's Criticisms:

- Reorganize the backlog
- There's a lot of overlapping user stories
- Add the user stories into the description of each card

Sprint 2

Part A:

1. What are some ethical considerations of your product?
 - Anonymity when creating posts
 - Making meetings viewable to only those who were invited
 - User data and event data are privatized
2. Address any features in your product that could be misused and how you plan to guard against misuse. *For example, if you plan to allow images to be uploaded by users, will you include a way for other users to report inappropriate images or use some other strategy?*
 - Users must have an account before posting.
 - Report function will be added for inappropriate posts.
 - There will be a cap on how many accounts can be created within a certain time period by a user.

Part C:

Trello Board Screenshot:

Sprint 4:

The screenshot shows a user interface element for a backlog item. At the top left is a blue square icon with a white camera symbol. To its right, the text "View an event" is displayed in bold. Below this, in a smaller font, is "in list [Backlog](#)". Underneath the title, the word "MEMBERS" is written in all caps. To the right of this text is a circular profile picture containing the letters "EW". Next to the profile picture is a small grey circle with a plus sign inside, indicating the option to add more members. Below the member section is a horizontal navigation bar with three icons: a list icon followed by the text "Description" and a "Edit" button. A brief description of the feature follows: "As a user, I would like to be able to view events."

Scenario: As a user, I would like to be able to navigate to an event's information from the homepage. (Gabriel)

Given: That I am on the home page

When: I click on an event

Then: I should be able to view the name of the event

And: See the date/time of the event

And: See the location of the event

Then: I should see an option to edit the event

And: Delete the event

And: RSVP to the event

And: Rate the event

The screenshot shows a user interface element for a backlog item. At the top left is a blue square icon with a white camera symbol. To its right, the text "Edit an event" is displayed in bold. Below this, in a smaller font, is "in list [Backlog](#)". Underneath the title, the word "MEMBERS" is written in all caps. To the right of this text is a circular profile picture containing the letters "EW". Next to the profile picture is a small grey circle with a plus sign inside, indicating the option to add more members. Below the member section is a horizontal navigation bar with three icons: a list icon followed by the text "Description" and a "Edit" button. A brief description of the feature follows: "As a user, I would like to be able to edit an event; if need be."

Feature: Edit an event (Taylor Newman)

User story: As a user I would like to be able to edit an event if need be.

Scenario: As a user I added an event, but now I need to update the event information.

Given: I am on the homepage.

When: I click on an event.

Then: I should have the option to edit the event.

When: I click on the "Edit" button.

Then: I should be on the "Edit" page.

And: I should see the option to edit my event.

And: I should see the option to delete the event.

And: I should see the option to RSVP to the event

The screenshot shows a user story card with the following details:
Title: Rating
Status: in list Backlog
Members: LO (with a plus sign to add more)
Description: As a user I'd like to rate an event from 0-5 stars

Feature: Rating (Chris Hanson)

User story: As a user I'd like to rate an event from 0-5 stars

Scenario: As a user I finished an event I had and I'd like to rate it.

Given: I was registered and completed an event

When: I visit the event page when it is over

Then: I should be able to rate the event I attended 1-5

Then: I should be able to leave a comment about the event with my rating

And: I should see the “close event” option

And: I should be able to see other reviews

The screenshot shows a user story card with the following details:
Title: RSVP an event
Status: in list Backlog
Members: C (with a plus sign to add more)
Description: As a user I'd like to be able to RSVP and confirm attendance for an event

Feature: RSVP for an Event (Lauren Ostrea)

User story: As a user I'd like to be able to RSVP and confirm attendance for an event

Scenario: As a user I was invited to an event, so I'd like to be able to RSVP

Given: I am on the home page

When: I click on the “RSVP for an Event” link

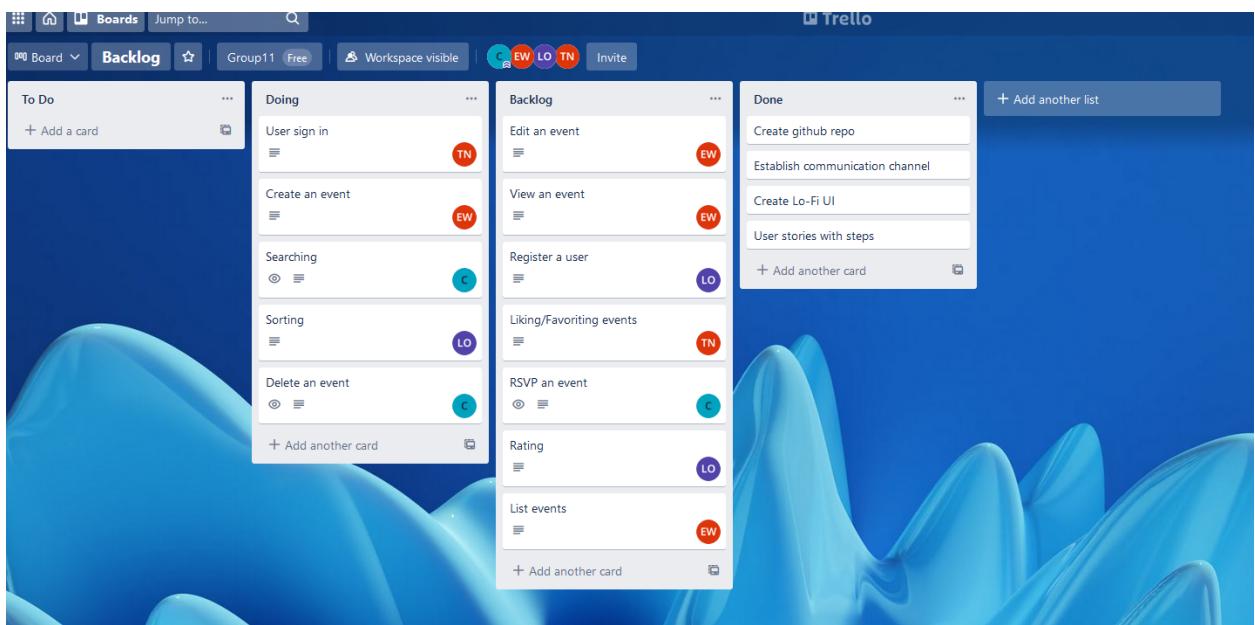

Then: I should be on the “RSVP” page

And: I should see the information of the event I was invited to

When: I click on the “RSVP” button

Then: I should see a confirmation message that I successfully RSVP'd

Trello:

Sprint 5:

Chris Hanson: HTML; Register | Sign in | Delete Event | Create Event

Taylor Newman: Python/Back-End; Register | Sign in | Home page

Eunique: Python/Back-End; Delete | List | View

Lauren: Python/Back-End: RSVP | Edit | Create

Gabriel Geneblazo: HTML; ~~View Event~~ | ~~Edit Event~~ | ~~RSVP Event~~ | List

User stories: Rating, Sorting, Like/favorite events, Search

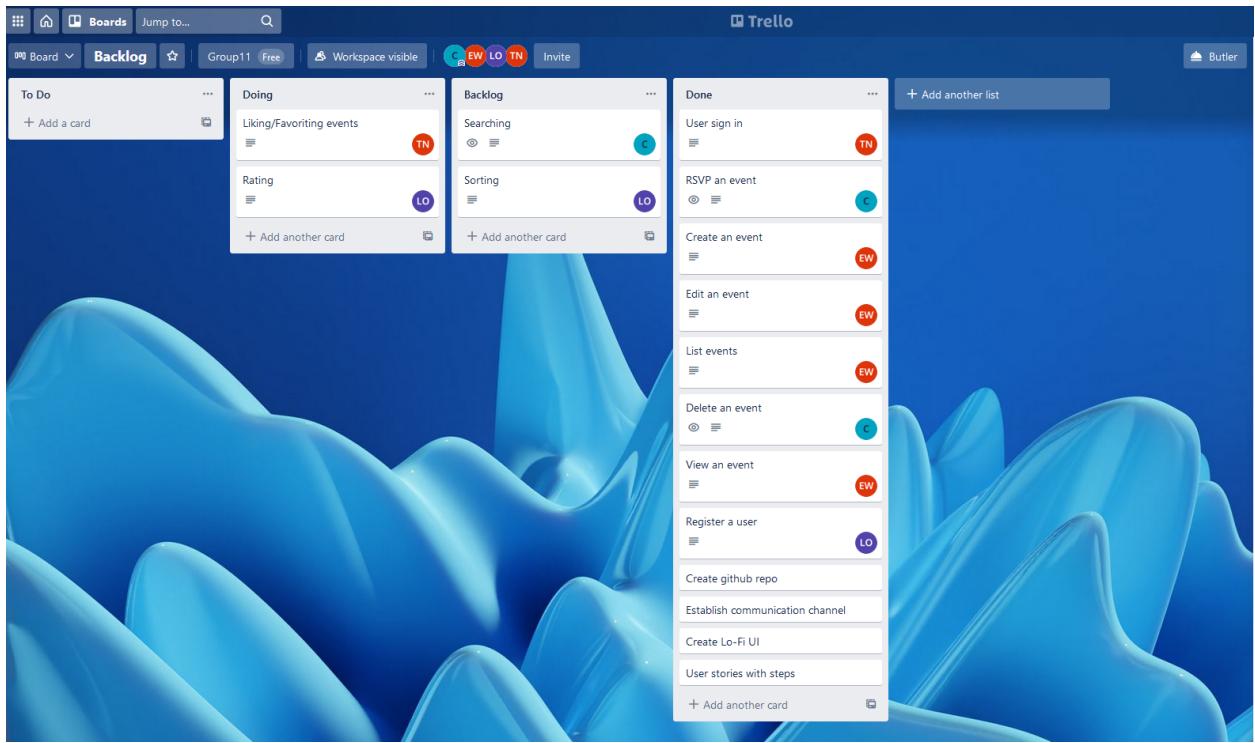

The base features of the product will include:

1. List events
2. View an event
3. Create an event
4. Edit an event
5. RSVP to an event
6. Delete an event
7. Register a user
8. User sign-in

Github SS:

The screenshot shows the GitHub repository page for 'ggenebla / Event-App'. The repository has 32 commits from 'taylornewman06' over the past 11 minutes. It contains files like 'templates', 'Group 11_Team Status Report.pdf', 'Project Group 11.pdf', 'database.py', 'event_app01.py', 'forms.py', and 'models.py'. There are no releases or packages published. Contributors listed are 'taylornewman06', 'Instra', and 'ewill158'. The repository uses HTML (50.0%) and Python (40.2%) as languages.
